Lighter is an innovative **ceiling fan**, designed and patented by the CristalRecord technical team. A different light distribution has been developed by extending the fan's light source to the translucent blades, incorporating LED strips. The lighting system allows to illuminate the central part of the fan with a power of 24W, the blades independently obtaining a power of 18W creating a cosy atmosphere or to illuminate both light sources simultaneously up to 24W.

This ceiling fan has integrated **Smart** technology, which allows you to control the fan from your phone thanks to the Tuya App, compatible with Amazon Alexa and Google Assistant.

It includes two 13 cm and 20 cm rods that allow you to adapt the height of the fan and control.
