Yen Collection **ceiling fan** with 3 wooden blades and a DC motor that reduces energy consumption while moving a large amount of air, making it a very efficient fan. It is installed directly on the ceiling, its height cannot be adjusted. This fan has 5 speeds and a summer/winter function that allows it to be used all year round. Its three blades are made of natural wood. It has integrated 15W LED lighting with three light tones. Thanks to the memory function, it allows you to recover the last light switched on. You can program the operation of the fan in periods of 1 - 2- 2 - 4 - 8 hours and at the end of the set time the fan will turn off.
