DC fan, without rods, with hidden blades. This fan combines the advantages of fans and ceiling lights. It has a high power (40W) and luminous flux (2800LM), allows temperature control or dimming. In addition, it facilitates the installation with a faster assembly and without screws.

Another of its advantages is the arrangement of its blades, located inside the fan and protected by a grid.

Thanks to this feature, greater safety is achieved compared to conventional fans, allowing safer installation in spaces such as children's or young people's rooms.

Its brown metallic finish is very aesthetic, perfect for decorating modern or designer spaces.
