LED fan with DC motor. The fan has a differentiating aesthetic element, in addition to the traditional light source of the fans, the Antila model has two strips that wrap around the body of the fan. These strips can be switched on independently of the main light source, or at the same time as the source when it is switched on with the neutral light (4,000ºK).

The Antila DC Fan has other outstanding features such as: reverse function, power-on memory, light temperature control and timer.

It can be installed on sloping ceilings and its height can be adjusted, as it incorporates two rods.
